If the employee has more than one EMPL record within your security scope, the records will appear for your selection. If only one EMPL record on file within your security, it will automatically take you into Job Data.

7. Click any of the blue links associated with the EMPL record you wish to view.
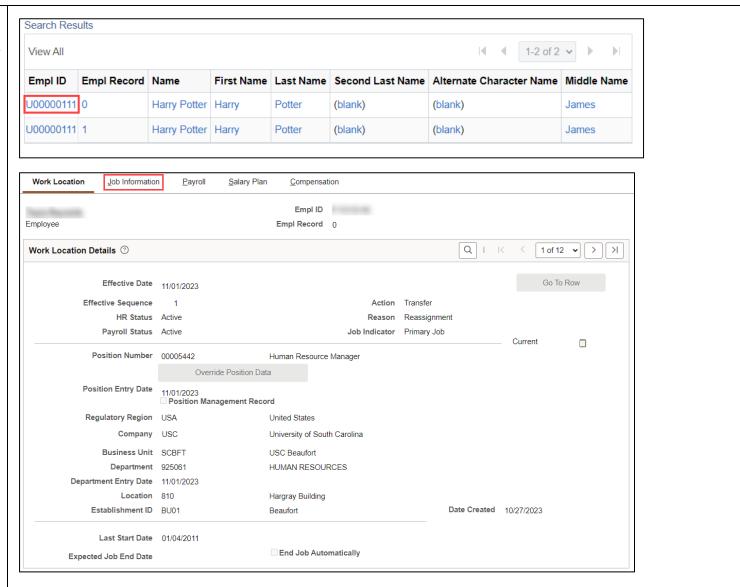

Job Data is made up of 5 tabs that contain different pieces of the job. All tabs have the same 'header' information (above the light grey line under the Payroll Status and Job Indicator fields). The header data indicates the last time the job was permanently changed, meaning it is the current job as of the Effective date listed.

As College/Division or Campus HR you have the ability to **Include History** and review all rows on job data since HCM went live on 4/1/2019. Note, Department HR Contacts do not have this ability so if they have questions about a historical action they will need to reach out to you for the information.

Work Location Tab:
This tab provides the position number, business unit (campus) department, location and applicable end-dates and auto-termination. Always note the Date Created field as that tells you the date the current action was approved and wrote to job data.

8. Click the **Job Information** tab.
